 "Leaders Know the Way"

MAP BASICS ASSESSMENT

Name _____

Circle True or False.

- T / F 1. A globe is a type of map.
- T / F 2. A topographical map is the best type of map to use driving in a city.
- T / F 3. A road map is the best type of map to use while hiking.
- T / F 4. A big problem with flat maps is they try to portray a spherical world onto a flat surface that ends up creating distortions.
- T / F 5. For map scales (like 1:24,000), the smaller the number on the right, the smaller the scale of the map.
- T / F 6. Small-scale maps are great for hiking.
- T / F 7. All longitude lines run through the north and south poles.
- T / F 8. All longitude lines are parallel to each other.
- T / F 9. One degree of latitude is 60 nautical miles.
- T / F 10. Latitude and Longitude are measured in degrees, minutes, and seconds.

Name the Continents or Oceans at these Coordinates:

- | | |
|-----------------------|-----------------------|
| 1. N 0° E 030° _____ | 4. N 60° E 090° _____ |
| 2. N 40° W 045° _____ | 5. N 20° W 135° _____ |
| 3. S 20° E 135° _____ | 6. S 10° W 060° _____ |
